Fresh graduate UI/UX Designer with hands-on experience designing responsive, user-centered interfaces in Figma and implementing modern, intuitive web experiences. Skilled in wireframing, prototyping, responsive design, and accessibility with a strong eye for clean and functional design. Eager to contribute creativity, adaptability, and problem-solving skills in a Junior UI/UX Designer role.

SKILLS:

- **UI/UX Design:** Experienced in designing responsive, user-centered interfaces focused on usability, accessibility, and clean visual hierarchy using Figma and modern design practices.
 - **Wireframing & Prototyping:** Skilled in creating wireframes, interactive prototypes, user flows, and intuitive navigation structures for web and mobile experiences.
 - **Responsive Design:** Experienced in designing mobile-first and fully responsive interfaces that adapt seamlessly across desktop, tablet, and smartphone devices.
 - **Design Systems & Accessibility:** Knowledgeable in maintaining visual consistency through reusable components, typography, spacing, color hierarchy, and accessibility best practices.
 - **Interaction Design:** Capable of creating engaging user experiences through animations, transitions, hover states, and microinteractions that improve usability and feedback.
 - **Front-End Implementation:** Experienced in translating UI designs into responsive interfaces using React, Vue.js, Tailwind CSS, HTML, CSS, JavaScript, and WordPress.
 - **Visual & Graphic Design:** Able to create modern layouts, presentation materials, and digital assets using Canva, Adobe Photoshop, and other design tools.
 - **Tools & Collaboration:** Familiar with Figma, Git, GitHub, VS Code, and collaborative workflows for design handoff, version control, and team-based projects.
 - **Problem Solving & UX Improvement:** Strong analytical skills in identifying UI/UX issues, improving user experience, and optimizing interface performance.
 - **AI-Assisted Workflow:** Experienced in using AI-powered tools such as Claude and VS Code AI assistants to improve design workflows, development efficiency, and productivity.
-

PERSONAL PROJECTS

<https://nateportfolio.vercel.app>

VANTAGE — Full-stack productivity platform built with React + Vite + Supabase. Designed and developed a productivity platform focused on usability, intuitive navigation, and responsive task management workflows. Live at vantage-peach-ten.vercel.app

PORTFOLIO — Interactive portfolio experience featuring strong visual hierarchy, smooth microinteractions, and accessibility-focused layouts. Includes scroll-based animations, a terminal-style UI easter egg, and a Firebase-powered admin CMS for real-time project management. Optimized for performance and accessibility. Live at nateportfolio.vercel.app

GROWBRAIN (Thesis) — End-to-end development of a Flutter-based cognitive rehabilitation game for students with mild impairments. Designed the full UI in Figma and implemented responsive, interactive gameplay features with accessibility as a core requirement.

EDUCATION

Pamantasan ng Lungsod ng Valenzuela (2022 - 2026)

Bachelor of Science in Information Technology (BSIT)

Expected graduation in 2026, with coursework and projects focused on web development, software engineering, and interactive system design.

EXPERIENCE

Full-Stack Developer & Project Manager - GROWBRAIN (Thesis Project)

Pamantasan ng Lungsod ng Valenzuela

December 2024 - April 2026

Responsibilities

- Solely designed, developed, and managed the end-to-end development of a Flutter-based cognitive rehabilitation game for students with mild impairments
- Handled everything from UI/UX design in Figma, frontend implementation, backend logic, and data integration — to project management and final delivery
